Initial conditions

- A **real business issue** that people care about, that it is something **worth talking about**.
- **Mind numbing complexity**, such that no single person or small group fully understands or can solve the issue
- High levels of or lots of **diversity**, in terms of the skills and people **required for a successful resolution** (far-reaching, boundless)
- Much **passion** and real or potential **conflict**, which implies that people **genuinely** care about the issue
- Real sense of urgency, meaning the time for decisions and action was "**yesterday**"

- All of the most important ideas, recommendations, discussions, and **next steps** will be documented in a report.
- When sufficient time is allowed, the report contents will be **prioritized** by the group.
- Participants will feel **engaged and energized** by the process.
